

Step 1: The Flex Pole comes with 2pcs, the telescopic pole and the flex tip. Insert the flex tip into the telescopic pole.

Step 2: Insert the flex tip rod into the Flag Sleeve. Extend the telescopic pole beyond the etched line on the pole. Tighten the pressure lock.

Step 3: Pull the flag all the way down the extended pole. Make sure that the end of the flex tip is at the end of the flag sleeve.

Step 4: Attach the Flag to the toggle to secure the flag.

Step 5: Place the bottom of the flag pole onto the ball bearing spigot on the base plate, X-stand or ground spike.

Step 6: Flag can be weighed down with a rubber weight.
