

MARQUEE

The Impact Canopy Marquee is designed with a high peak tube supported by cross cables extending from each corner tube, maximizing the usable space underneath while at the same time eliminating the need for interior frames or support poles. The simple design allows for easy transportation, storage, and installation involving only two people due to the reduced amount of hardware in comparison to other frame or pole tents. Marquee tops are custom printed on vinyl with digital printing. Custom printed side walls are also available.
