

PALISADE WALL

Whenever it's show time the Impact Palisade simply pops open and the show is on. The dye sublimated fabric graphic is secured to the frame with velcro and stretches smooth once unfolded. The changeable fabric graphics can easily be replaced with no tools required. The fabric banner can remain on the expandable frame for easy set up and take down. The Impact Palisade is designed to be lightweight and the entire Palisade Display - expandable frame & graphic fabric - fits into a soft trolley case that can be easily transported to an event in the trunk of most cars.
